—MANN'S—
PARCHMENT COPYING PAPER.

This Parchment Paper is **MUCH STRONGER** and shows a **CLEARER COPY,** than any other ever made for the purpose. The ink is **LESS LIABLE TO SPREAD,** and can be written upon with a pen.

DIRECTIONS FOR COPYING.

Place a piece of blotting-board under the leaf of Copying Paper; then with brush, wet the leaf. Rub in the surplus water with the hand: then place the written letter on the leaf. (leaving the blotting-paper under the leaf, to take up any excess of water that may yet remain,) place it in the press, and in 10 or 15 seconds a perfect copy will be secured.

☞The leaves WILL DRY AS SMOOTH AS SILK by placing the book in the Press after Copying.

☞Place the oil sheets between the copies just made, to prevent blending or setting off.

Another way when many letters are copied.

Procure a tin box with lid to hold 20 blotting pads.

Dip half the lot of blotters in water, let them drain off a few moments; then place a dry blotter between each wet one, give them a few minutes squeeze in Press and they will remain wet for three days; then take an oil sheet, place it to the left; then lay a wet blotter; then turn leaf of Copying over on blotter; then lay your letter on; then another oil sheet, and so on, and you can copy all your letters at one time, thereby saving time. With a little care and experience as to wetting at first, you will be so well pleased, as never to go back to old way.

BOXES FURNISHED IF DESIRED, AT SMALL COST.

Sir,

In my remanded requisition for supplies of stationery &c for this Mint dated 6th June last, the following articles were called for, for the Coiners use; namely;—

One book 200 ff. Receipts & Deliveries of Gold and Silver Bullion & Coin;

500 Copies of form 152 (Silver Coin) and

1000 Leaves of absence form No. 52

none of them have yet come to hand.

Will you be kind enough to ascertain when we may expect them?

In this connection I am now that the Coiner is in want of a large Price book. If you have them in stock, will you please have one forwarded as he wants it

for immediate use

Sir:

The last of the four department summaries of the business of this Mint during the last fiscal year, reached my office after Mint hours yesterday afternoon and the stenographer who had not yet left the building kindly enveloped them to you in response to your telegram which was received about 4.30 p.m.

I have now to add in behalf of the General Department that the only material improvement in our facilities and accommodations here during the past year, are the following:-

1st. The last of our small brick vaults

in the basement for the use of the Cashier was lined with steel and furnished with modern doors and improved locks and thus made thoroughly burglar proof, which adds to the security it contends, and lessens to that extent the anxiety of the Cashier who is their Custodian; and

2nd. What is of more importance, there has been Constructed in the basement of the building immediately beneath the Central Court yard of the Mint a steel-lined burglar-proof vault, with capacity sufficient to store $5.000.000 standard silver dollars, thus immensely relieving the long standing pressure upon us for storage room.

3d The Construction at the same time of a large steel vault in the Central area

of the Mint on a level with the main floor of the building - said by the manufacturers to be the only one of its style and kind in the United States - divided into compartments, for the daily use of the Melter & Refiner, the Coiner, and the Superintendent, in which we can now immediately deposit for safe keeping our large silver purchases, instead of having the bars in wire cages a lying loose on the pavement. The advantages of this vault for safety and commodious use are very great and will greatly facilitate the current operations of the Mint.

Of the projected alterations and enlargement of the Mint building under the appropriation made by Congress, I cannot in a position to speak definitely, as the

plans for that enlargement are still in the hands of the Supervising Architect and when the alterations will be commenced, or are intended to be completed, I do not know

Referring to your letter of the 18th inst. and voucher No. 32 of my ordinary account for the month of August bill of the Hall Steam Pump Co. of New York, I have to make the following explanation which I was under the impression had been transmitted to you the day after the receipt of your letter, but which proved not to have been the case.

The item for Railroad fares — $7.55 — occurred in this way: The works of the Hall Steam Pump Co. of New York, are located in Wilmington, Del., and they sent a workman to repair our pumps, which occupied him a week. As he resided in Wilmington, he came up

D

to the Mint every morning, and returned home every evening and the Company charged, - as you will see by referring to the voucher for each specific item of service, - and then added the railroad fare for the workmen in going to and from the Mint. It is an item for which it will not be possible to procure a receipt from the Railroad Company, but it is hoped that this explanation of the nature and necessity will be sufficient to pass the account

Mint of the United States at Philadelphia, Pa.

SUPERINTENDENT'S OFFICE.

November 5th 1889. 188

Sir:-

I find we have a large surplus of some black forms and a an uncovetitable deficiency in some others, and am obliged to make requisition upon the department for 150 sheets of the enclosed form "purchasers of silver bullion" which are used entirely for our domestic purchasers of silver. The abstract clerk informs me that he should have a new supply within a week, and supposing you have them in stock I shall be very much obliged if you will let us have the required number in that time, as we have nothing that we can put in their place.

Very respectfully,

O. C. Bartyshell

SUPERINTENDENT'S OFFICE

November 6th 1889.

Sir:-

I have the honor to request that you will indicate at as early a date as possible the amount of standard silver dollars you will require of this Mint for the current month.

It has always been customary towards the close of the calendar year to coin a small amount of each denomination of coins that have not been coined during the year. Have I your approval of the continuance of this custom during the current year ? I would certainly advise it.

Very respectfully,

Your obedient servant,

Sir:-

On the 10th of October last my predecessor in office made requisition on the department for 500 pay rolls as per sample sent. Those which we had received having been I am informed defective. We have no advices here as to whether that requisition was received or whether it will be honored. I now have to inform you that we have enough pay rolls on hand to answer for the present month of November but not enough to meet our necessities for the month of December, and I write to know whether or not the requisition referred to will probably be filled.

I hope that hereafter our semi-annual requisitions for blanks and forms will be so carefully made out as to insure a full supply for the usual period of six months and relieve myself and the department from the embarasment of special requisitions at intermediate periods.

In reply to the closing suggestion in your letter of the 8th inst in regard to the pay rolls, it is due both to you and to myself to state for your information that our blank pay rolls are always kept under lock and key, and the clerk in charge of them and who always makes out the rolls is a very neat careful and methodical man who never blots or tears the blanks and there is never any wastage. Every sheet is used for its intended purpose, and no other, and none are used but those which are absolutely necessary.

Desiring to conform as closely as possible to the Regulations and Instructions, I desire authority for the purchase of a type-writer, desk and stationary for the use of my Private Secretary. This purchase is a necessity in consequence of the increased volume of correspondence devolving upon me at this time. I have also found it necessary under the emergency of a very large number of applications for appointments to have a suitable register made in which to record the same.

The oil cloths upon the floors of the Chief Clerks and Bookkeepers offices were in a very delapidated condition, and I have purchased and am having this renewed. These are all expenditures which appear to me to be of importance and I would be obliged to you for your full approval of my course in involving the same.

We have on hand some sixty thousand Dollars worth of uncurrent Minor Coin & golds, the value of which now stands to the credit of the Treasurer of the United States, and against which that Office has been drawing Transfer Orders payable in new Coin.

My especial object in writing on this subject is to inform you that during the time of Office of Director Kimball, and in consequence of the great pressure on the Mint for Coin, that Gentleman orbal requested that the receipts of these Pieces should be suspended. If this

suspension shall still continue, and the Treasurer should continue to draw against the fund, I shall be unable to honor his orders without trenching upon the Minor Coinage Metal fund, or the Minor Coinage Profit fund.

Would it not be well under the circumstances for me to receive your instructions to commence the recoinage of these old coins, and before any further transfers of such Coins are made to this Mint?

Mr. Joseph Wharton has about 50,000 pounds of 5 cent blanks left over from his recent contract and five or six thousand pounds of nickel blanks. He is anxious to get rid of them, stating that he was induced to make them, by representation of parties in this Institution, that it would be well to have a supply on hand, so as to meet the wants of the public whilst arranging for the award of the new contract. He is willing to put the cent blanks in at the rate he was paid on his contract, and the nickel blanks in at the rate paid the present contractor. Will you authorize me to purchase them ? Such action I believe will stop the constant criticisms he or the representatives of the Scoville Mfg. Co., make of the successful contractors mode of doing business. Inasmuch as there is a large amount of minor coin now due depositors it seems to me it would be well to purchase this additional supply and as there seems some little justice in Mr. Wharton's statement of encouragement by parties connected with the Mint to keep a supply on hand, this would settle all cause of complaint.

SUPERINTENDENT'S OFFICE,

November 18th 1885.

Dear Sir:-

In order to properly use vaults D and E I should be greatly obliged if you will have the following work done to them:-

1st. The bottom of vault D lowered and vault doors to be lowered.

2nd. Lining of vault D to be lengthened in height same as has been done in vault C.

3rd. The bottom of vault E to be lowered lined and fitted with doors similar to vault D.

It is imperative that this work be done at once and the business of the Mint is greatly impeded by the present condition of the vaults. I would respectfully suggest that if it is as favorable to the government to employ the parties now erecting the large vault in making these changes it would be well to do so, as they are well acquainted with the Mint and their workman are at present finishing the vault in the court yard. These parties are also well known to the officials in the Mint and it is not desirable to have strangers in the building.

Very respectfully,

Joseph M. Hannock, Esq.,

In reply to your letter of the 20th inst. calling my attention to an error in the Refining charges on abstract of Silver Purchases No 20 July 20th. I have to inform you that the Parting & Refining charges proper should be entered $ 2.05

and the Toughening charge of .68

making the charges $ 2.73.

From this you will see that the error simply arose from the incompleteness of the classification of charges entered on the Abstract sheet. Will you kindly make the necessary changes on the Abstract sheets.

I have the honor to enclose herein a letter from the Melter and Refiner relating to charges that should be made against the Refinery earnings, instead from the Ordinary Account, as at present.

It is clear to me, that all the expenses necessary to receive and alloy the bullion of depositors, ought to be met out of the profits remaining over the charges made for this work, and I therefore heartily approve of Dr. Tuttle's suggestion, that the wages of the men employed in the deposit Melting Room, the earnings of which room are credited to the Refinery fund, should be properly charged to that fund. With your approval, I will place the foreman and three helpers in the Deposit Melting Room on the Refinery roll. For the same reason I respectfully ask you to approve of bills for supplies for the room named, such as oak charcoal &c, charged to the Refinery Account.

Hon. E. O. Leech,
Director of the Mint,
Washington, D.C.

Sir;

In your confidential note of 27th inst you urge the coinage of Minor Coins as rapidly as possible. I fully concur in your views respecting the absolute necessity of meeting the demand for these coins, and assure you that I will strain every effort to do so.

We have in our Coining Room eleven (11) presses of all kinds. Four of these are on Silver Dollars. two on Dimes. one on Nickel and three on Cents, and one large press, Ajax, in the Machine Shop. This latter press will be in place again by the middle of next week.

These presses are all employed now I have arranged for their employment in a more systematic manner, so that the output next week will be largely augmented. It may be necessary to keep some of the Coining Room employés a little later than regular hours during next month. The Carrier will have nearly $50.000 of Dimes on hand over and above orders on the end of the month, so if we could be relieved of $50.000 of the $100.000 of dimes desired by the 15th of December it would give us still greater facilities for Minor Coins.

There is no arrears in Minor Coins orders. This is chiefly due to the transfer of coin to the Assistant Treasurers at Boston, New York, New Orleans, San Francisco, Chicago, Cincinnati and Baltimore. Since the middle of last month the Treasurer has transferred to the parties named no less in

amount than forty three thousand ($43000) dollars, wholly exhausting our minor coin in stock, and thereby preventing me from filling current orders.

An order to ship $1000 in bronze coin was presented by the Express Company this morning, and could not be paid for want of funds.

Had these transfers not have been made I should have had no minor coins due and unpaid beyond what would be included in unmatured drafts from depositors.

Very respectfully
Your Obedient Servant

December 3rd 1882.

Sir:-

I have the honor to submit herewith, the proposition of the Edison Electric Light Company of Philadelphia, to supply this Institution with its system of lighting.

The Electric Light Plant now in the building, was introduced in the winter of 1882 when this system of lighting first began to be used. It belongs to what is known as the Weston or U.S. Electric Light Company, or the old Maxim system, and is far behind the incandescent methods now in use. It was I believe one of the first plants made and besides being almost obsolete, is literally worn out and of no use whatever. You will note that the proposition submitted does not allow anything for the appliances now in the Mint-- indeed instead of being considered of value, they are treated as hindrances.

The original cost of the present plant was	$6457.40
Estimated cost of engineer for 6 1/2 years	6500.00
Total	12957.40

The engine is good, and is used occasionally for sweep grinding purposes, but the dynamos are absolutely useless.

The gas bills for the last four years show as follows:-

E.O.I.No.2.

1886	$3864.32
1887	3800.00
1888	4512.75
1889	4848.45

During '86 and '87 and part of '88 the present electric plant was in use, so that '89 can best be taken in comparison with proposed cost of new system.

The cost of the new plant per proposition is $2100.00 The cost of running 408 lamps at 3/4 cent each per hour would be $3.06 which for five hours, say from 6 to 11 P.M., would be $15.30 per night, or $4788.90 per annum, or about equal to the gas bill of 1888 and 1889.

It is not at all probable that the entire 408 lamps will be in constant use, and it would only be in the Winter Season, during the hours named, so I feel convinced that the Edison Light would prove cheaper than gas.

Something must be done to improve our light- the gas now furnished is of such an inferior quality that it is difficult to see with it. With three large burners in my office I find great difficulty in seeing, and in the Adjusting Room especially, it is very unsatisfactory. I would strongly recommend the acceptance of the proposition of the Edison Electric Light Company.

E.O.I.No.3.

so that we can promptly have it introduced into the building.

If you find on examination that you can authorize this may I ask you to kindly return the papers submitted to this office, so we can intelligently arranged with the Company named.

Sir,

I have waited patiently for the blank acknowledgements of the remittance for Minor coins, which were promised, in a few days, in your letter of November 8th, and as I have not since heard anything of them, I fear they have been overlooked, or forgotten, by the public Printer. As their absence is a very positive inconvenience in the despatch of business, I take the liberty of again calling your attention to the matter, to see if they can not be furnished without further delay, as the form is a very small one, taking very little time for composition, and press work. The remittances for minor coins continue to be numerous, and to acknowledge their receipt, requires from thirty to forty manuscript letters a day, for that purpose alone.

SUPERINTENDENT'S OFFICE,

December 6th 1889. 188

Sir:-

I have the honor to acknowledge the receipt of your favor of the 5th inst relative to the results of the tests of silver dollars coined at this Mint during the month of October. I enclose herein a letter of Mr. Eckfeldt Assayer, relative to the assays of the melts for the month of October, in which he states that they show a remarkable uniformity of fineness. The Assayer also informs me that the assays of condemned pieces for the month of October shows also a uniformity of fineness.

The large variation in the fineness of the different pieces as stated by you must therefore be the result of some of the operations in the coining department. I would respectfully suggest that a special assay of the pieces reserved for the pyx for the month stated be made at the time of the forthcoming annual assay in order to verify the tests made by your bureau. I will endeavor to insure a more uniform product in the future.

Very respectfully,

Superintendent.

Hon. E. O. Leech,
Director of the Mint,
Washington, D.C.

December 6th 87

Sir,

In regard to the letter of the Director of the Mint of December 5th, referring to the variation in the fineness of Special "Assay coins" sent to the Mint Bureau, I can state that in the ingots made and assayed for the month of October 87, there were but four melts passed at 900 or over. Our record of Assays for the Month shows a remarkable uniformity in the fineness; indicating a careful work in making up the melts.

Our only trouble was, that, we considered the average as rather too low, and mentioned the same to the Melter & Refiner several times.

Very respectfully

Sir;

I have the honor to enclose herein, a letter from the Curator of this date, strongly recommending that the per diem pay of Mr. Daniel T. Fuller, be increased to $6.

Having had the honor of serving as Curator of this Institution for many years, I cheerfully bear witness to all Mr. Heal avers respecting Mr. Fuller's merits. He is, and has been for many years, a most valuable man in the place he occupies, and his faithful, conscientious discharge of the duties incumbent upon him, merit the recognition recommended. The proposed increase of

E.O.L. 12/10/89 2

pay, would be a very slight advance of the expenses of the Coining Department, inasmuch as 75¢ per diem is saved on the Chief Weighers wages (these were formerly $5.75, and are now only $5.) so that in allowing Mr. Faller $5. per diem the wages roll, would only be advanced 25¢ per diem.

Trusting that you may see fit to permit Mr. Faller's long services the substantial recognition desired, I am

Very respectfully

SUPERINTENDENT'S OFFICE.

Dec. 10 1889

Sir,

On the 3d of December I sent a letter announcing the appointment of M. H. Cobb, Chief Clerk of this Mint, together with his official signature, to S. Davis Page, Esq. Asst. Treas. U.S. at Philadelphia, stating that by law Mr. Cobb is designated to act as Superintendent in my absence. A similar notification was sent to Wm. Ellis H. Roberts, Asst. Treasurer U.S. at New York, which was apparently satisfactory to Mr. Roberts, he having given full faith and credit to my certificate.

Mr. Page, however, is not disposed to abate any jot or tittle of what he regards as law touching the matter; and he insists on a certificate of the appointment of Mr. Cobb from the Bureau of the Mint at Washington.

I replied to Mr. Page by citing his attention

to Sec. of the R.S., and particularly that sentence relating to the Chief Clerk's function in the absence of the Superintendent. I directed his attention to the fact that the assignment was by legal prescription, and as he is a lawyer, supposed that it would send the correspondence. I received a long letter from him this morning declining to take the legal view of the matter, and asking for an official notice of Mr. Cobb's status from the Director.

To me this is an absurd wrangle; but in order to avoid unnecessary friction between bureaus of the same Department, I have thought it best to submit the matter for your decision. If the Secretary of the Treasury regards the demand made by Mr. Page as necessary, and proper to be granted, may I ask you to forward to Mr. Page such official notice as you may deem proper? Whatever action you

Sir:

The Treasurer of the U.S. has been making heavy drafts upon our Minor Coinage Profit balance from time to time for the purpose of supplying the Assistant Treasurers U.S. and U.S. Depositaries, for distribution in their respective localities. In consequence of these drafts we shall at close of business to-day, practically have no balance of Profits against which the Treasurer can draw, and any further honoring of his drafts will necessitate a diminution of the Minor coin metal purchase fund.

In order that you may understand this in the face of an apparent balance of Profits in my hands, I beg to state that about Fifty-eight thousand (58000) dollars of that balance represents unavailable minor coins [illegible]

recoinage the demand for such currency has been so active, and the other allotments of silver coinage have been so large, that the business of recoining redeemed Minor Coins has proceeded in a desultory way, and slowly.

In view of these facts and circumstances I beg to suggest that the Treasurer Genl. be requested to suspend further transfers of minor coins until the profits from continued coinage, and coinage of the redeemed coin sent forward for recoinage, shall have replenished the Minor Coinage Profit Fund to such a degree that drafts made against Profits shall not be paid out of the metal funds.

My dear Sir;

I am in receipt of your favor of 10 inst relative to pushing coinage of minor coin. I assure you I am just as desirous as you can to satisfy the demand for these coins, and am pushing their manufacture as rapidly as possible. We have eleven presses in all. ~~eight~~ seven have been on minor coins for some time and today another was put on. The disabled press has been repaired and is hammering away. We cannot catch up by the 21st inst but we can get well ahead by that time. The Scoville

Manufacturing Co., accepted the proposition and have delivered some of the blanks.

You should have been informed of this on the 17th of last month. I regret that it was overlooked.

I will urge by all the means we have, the manufacture of minor coin.

Very truly yours

I would call attention to the fact, that in the last shipment of Gold from the Assay Office at Boise City, there is a discrepancy of over $57.– between the invoiced value of the shipment, and the value as calculated from our assays. After assaying the Mass melt I found there was considerable difference in value; assuming that there might be a want of uniformity in finness (although the assays showed a perfect homogeneity), I had the mass re-melted and assayed, but with the same resulting fineness.–

SUPERINTENDENT'S OFFICE,

December 18- 1869

Hon. E. O. Leech,
Director of the Mint -

Sir;

The Chief Clerk of this Institution is one of the most responsible and important places in it. Under section 2502 Revised Statutes, he becomes in the temporary absence of the Superintendent, Acting Superintendent, with all the responsibilities of the place. For some unexplained reason the Cashier of the Institution, in point of salary, is rated above the Chief Clerk, whilst in reality the latter certainly outranks the former, as he can regulate the policy of the duties of the Cashier, and the Cashier would be obliged to take instructions from him. The salary of the Chief Clerk is $2250 per annum - that of the

Cashier $2500. I wish to strongly urge that the Salary of the former be increased to $2500 per annum, to be at least equal to that of the Cashier.

When I assumed the position of Superintendent, I desired as the Chief Clerk of this Mint, the most best qualified for the place I could get, and I found that Mr. Mark H. Cobb, who was the Cashier was the man I wanted. He came here in 1870, and his long service, earnest, absolute devotion to the interests of this Institution has peculiarly fitted him for the position of Chief Clerk. When I expressed my desire to have him accept the place, he unselfishly said if I desired his services, he would render them whenever I chose to designate. although he received $250 per annum to take a place he so very acceptably fills. Apart from the fact that the place is rated too low in

Cobb

salary, Mr. Cobb's ability entitles him to a salary at least as great as the one he relinquished, and the services he renders the Government in the new place, are fully entitled to receive all of the increase reported.

Trusting that the recommendation submitted will meet your cordial approval, I am

Very respectfully
Your Obedient Servant
O. C. Baldwin
Superintendent

It is needless to add that Mr. Cobb is entirely ignorant of my recommendation, and that he has not referred to it at all.

Sir:-

Referring to your letter of the 13th inst., relative to an apparent discrepancy in the Coin Profit and Loss account, I beg to say that this discrepancy is due to a failure to receive the added one cent pieces deposited for recoinage from time to time by the Treasurer U.S. and thus to have covered the apparent losses by "profits". I am informed that efforts were made to have the redeemed coin converted into nickel five cent pieces during the latter part of the term of my predecessor but the pressure of dimes coinage and for minor coins was so severe that the conversion proceeded in a desultory manner.

In order to make good the apparent deficiency of which you speak, I have to day arranged for the recoinage and conversion of nickel one cent [illegible]

in sufficient quantity to insure profits amply to cover the discrepancy on or before the 31st of the present month. This will obviate the necessity for carrying the deficiency caused by such writing into the accounts of this Quarter. I regret that there should have been any cause for concern.

SUPERINTENDENT'S OFFICE

December 20th 1889. 188

Sir:-

I beg to lay before you certain facts relating to the conduct of business in the office of Cashier, and to ask your coopperation in measures to facilitate the transaction of business should it seem to you practicable and proper.

The business of the Cashier has increased cumulatively for several years, and there has been fair work for three persons in his office during the last fifteen years. Several years ago Mr. Conant, during one of his visits, and after looking into the administrative and routine duties of the office volunteered the statement to Mr. Cobb that he needed another man. Dr. Linderman frequently assured Mr. Cobb that his duties were more various than comported with health and comfort and the equitable distribution of labor. Both Superintendents Pollock and Snowden as well as Supt. Fox frequently assured Mr. Cobb that he might have another man for the asking. Mr. Director Burchard also on one occasion assured the Cashier that he could have an application for another clerk favorably considered by the Bureau. I think you will recall the fact that you have observed, while here, the need of [illegible] [illegible] The hindrance to an acceptance of these offers by Mr. Cobb was the lack of accommodations for even two men in the office.

E.O.L.2.

And the result of it was that the Cashier has for years kept the details of every particle of routine constantly in mind, arriving early and attending to tests for deliveries from the coiner, reserving the assay pieces, scheduling the shipment orders, working off the Mint coin shipments and comparing shipping tags, amounts, and destinations, and at the same time leaving his work to do business at the counter involving thousands and consequent risks. In addition the Cashier has had charge of many vaults, and has had to systematize and bear in mind the combinations of no fewer than twenty five combination locks, so as to be able at any moment to open the doors without recourse to any memoranda.

The strain has been, and is, enormous; and Mr. Cobb assures me that one need inquire no further for reasons why he accepted the Chief Clerkship with loss of income. The strain was never relaxed, and in my judgment it was one to which few persons could be subjected and not break. The Cashier has now enough to do to supervise the work in his office and keep the vault accounts. I am sure that Mr. Cowperthwaite will prove unable to endure the strain, and he himself admits that it transcends his power of endurance. Mr. Leidy is chiefly expert as a teller, and if constantly called from the counter to other duties

R. S. L. C.

loses his equanimity and increase the risk. It cannot be expected that any new man will willingly consent to assume the duties of two, and if pressed three men, as the late Cashier was accustomed to do. He had reduced his duties to a system, it is true, but a system that to others would seem onerous and trying. Under these circumstances I most respectfully but earnestly ask that I be authorized to appoint a competent accountant for duty in the office of the Cashier of this Mint, at a per diem commensurate with the responsibilities of the position. If this should be favorably regarded by you, I would suggest that steps be taken to have the position made one of salary by the terms of the appropriation bill now pending, or soon to be considered. I shall be glad to second any effort you may see proper to make to bring about an end altogether so much to be desired.

I beg you to excuse the length of this communication. I am very much in earnest, and it seems to me that aid so freely admitted to be necessary, and so often offered in the past may with added reason be granted now. The Cashier's office as been altered so as to permit of the accommodation of another clerk, and this has been done so effectively that Mr. Comperthwaite is ready to assign duties to each of the force in such manner as to facil-

itate the transaction of business and take the constant strain of mind and body off the Cashier, distributing routine and counter duties between the clerks.

Very respectfully,

Your obedient servant,

Superintendent.

The Assayer has carefully assayed the coin, and finds it to contain 799 parts of fine gold with an alloy of platinum, silver and copper. It is fully described in the Detectors, is a dangerous counterfeit, and, happily somewhat rare. Those of 1872, 1880 and 1881 are not quite so well done.

SUPERINTENDENT'S OFFICE,

Dec. 31 1889

Sir:

Pursuant to your verbal request during your late visit at the Mint, I have requested the United States Express Co. to submit a proposal in writing for the removal of the silver coin stored in the Post Office vaults. This was some days ago. Mr. Sedgwick came personally to learn further of what was required, and said he would refer the matter to the General Superintendent. So soon as his proposal shall shall be received, I will promptly forward it to you as per your request of the 30th inst.

Permit me to say as respects the time of commencing the work of removal, that the Cashier is now, and may be for some days, disabled by the influenza now prevalent, and the same is true of a number of employes whose services would be required constantly

in the work. Apart from this possible
inability I am no reason to hinder the
transfer beyond the month of January.

I have noted your several requests in
letter of Dec. 20, and will attend to them in
due season.

Sir;

Some year or two ago, there was regularly employed in the Depart Melting Room six persons including the foreman - five of them were designated Depart Melters. When my predecessor dispensed with the services of F. C. Herring, he did not fill his place, but permitted a Laborer to be used instead.

William Gallagher, Laborer, has been working in the Depart Melting Room for some time, and is perfectly capable of being made a regular Depart Melter, and with your approval I desire to transfer him from the Laborer's roll at $2.25 per diem

E.D.L. 1/2/90 - 2

to Deposit Melter at $3.25 per diem, and to place his name on the Refinery Roll. to take effect from this date.
